

Bison for Life

Residential Basketball Equipment

2011-2012

How to Select a Basketball System for Your Home

Choosing between a fixed height and an adjustable pole system.

Make this decision based upon the ages of the players and the level of basketball you want to play. The official high school and college competition goal height is 10', but a new basketball system fixed at 10' will be a big disappointment to youngsters learning to get the ball to the goal. Most young players and teens will also want to lower the goal below 10' for slam dunk action. A 10' fixed-height goal is appropriate if you want to play only at the official competitive height.

The backboard material affects the quality of play.

Glass is used for all competition backboards in high school, college and pro arenas because a glass backboard gives the best ball rebound. A home court with a Bison TruGlass backboard is the best training ground for competitive-level skills. Clear acrylic backboards, which give the look of glass, and backboards of graphite or fiberglass all have aesthetic, durability or price benefits – but none of these compare to the playability of glass.

Look for durability to ensure years of family fun.

Beware of basketball equipment makers that litter neighborhoods with rusty, tilting poles, backboards that age too soon and sagging goals. Compare features to get a clear picture of what you can expect your system to look like in the years ahead. Bison's warranties will give you confidence that your equipment will stand up to years of use.

Safety is not an option. Generous setbacks and pole padding are essential.

The distance between the pole and the backboard ranges from 22" to 60" on Bison pole systems. There's no one blowing a whistle under the boards in most driveway games. If you expect aggressive play, you should consider a greater safe play area. Pole and backboard padding also add a measure of safety when there is rough-housing on your court. In the interest of your kids' safety, Bison makes SafeStuff pole padding standard on every residential system.

Consider where the system will be installed.

Will your system be installed on a driveway in the front of the house? On the side, or out of sight in the back yard? Street appeal and coordination with your home and landscape should influence your purchasing decision in more visible areas. Choose a system that complements not overwhelms your home and landscape.

Plan for your family's future.

Select a system that will keep up with changing skill levels. If you want your youngsters to play with you now and on a competitive team in the future, you should carefully consider pole and backboard rigidity. Always select equipment warranted to stand up to active play. And look for equipment that won't detract from the value of your landscape.

Understand What You are Buying

Understanding what you're buying is key to getting the right basketball system for your home. Bison uses the following terms to help point out key features and differences on our systems.

Safe Play Area As the name implies, the greater the safe play area the greater the player safety during aggressive play. Safe play area is the distance from the face of the backboard to the pole. On a competition indoor court the distance from the face of the backboard to the out-of-bounds line is 48". Safe play area is particularly important on systems that are regularly lowered for slam dunk action.

SafeStuff™ Only Bison includes a pole pad with every residential system. We call this feature SafeStuff because we don't think player safety should be optional.

DuraSkin® In the late 1980's Bison developed a dense molded bolt-on backboard padding system that was durable for indoor or outdoor use. Often imitated, but never equalled, DuraSkin is available as an option on any rectangular backboard. Backboard padding is required at all levels of official college and high school play to protect players from backboard contact.

Direct Goal Mounting Backboard durability is virtually a non-issue on a Bison system due to the goal mounting system that effectively mounts the goal through the backboard and directly into the steel pole structure. There is almost no stress put on the backboard even during slam dunk action.

Flex Goal Bison flex goals are designed with many of the same durability features of our competition breakaway goals but require less pressure to release. This improves player safety and rim life. Flex goals will hold up in any climate.

Direct Bury This method of installing a pole system inserts the pole into the ground between 30" and 48" depending upon the size of the system. Concrete is placed around and in the bottom of the pole making the installation permanent. Ground sleeves are available for 4" direct bury poles to make removal possible (see page 9).

Pedestal Base Mounting Many Bison systems have a mounting plate on the bottom of the pole that allows them to be bolted onto (and unbolted from) a poured foundation with protruding threaded bolts. This lets you easily take your investment with you when you move.

Powder Coated Finish Powder coating provides a finish that is far superior to a finish from a wet spray paint system. In addition to beauty and durability, powder coating is environmentally and employee friendly, without the hazardous waste and toxic fumes common with the wet paint process.

TruGlass™ Bison pioneered the use of actual tempered glass on residential basketball systems over 25 years ago. Over the years an ever increasing number of homeowners have recognized the superior rebound of TruGlass. Today Bison sells only TruGlass on most systems.

Smoked Backboard While clear glass or acrylic matches the look of gymnasium backboards, many homeowners like the curb appeal of tinted backboards that reduce glare and provide a contemporary look. Bison offers smoked backboards on most systems.

Acrylic Backboard While tempered glass is the norm in virtually every gymnasium in the country, home backboards have traditionally been constructed of clear acrylic, a plastic material, due to cost and other considerations. Acrylic provides the look but not the rebound of tempered glass.

"No matter where I find myself coaching, playing or watching basketball, I expect quality equipment. For my backyard court, I chose Bison so no matter what the level of play, I know the game is authentic. I especially value the fact that every Bison residential system comes standard with SafeStuff pole safety padding."

Bill Self, Head Men's Basketball Coach
University of Kansas Jayhawks

4" QwikChange™

Adjustable Basketball Systems

Hard work and dedication pay off on the court and in the design and manufacture of quality equipment as well. Bison's 4" square QwikChange poles have 75% more steel than common round poles. One of these systems is going to look great in your driveway for years to come! It's going to grow with your kids, too. Height adjusts from 7½' to 10' in 6" increments. The height adjustment mechanism has over ten times the pivot contact area of commonly compared round pole systems, so go ahead and let them slam dunk! The mounting design for the pro-style flexible goal transfers playing stress to the pole, protecting the backboard. Choose from three backboard options.

4" & 5" ZipCrank™

Adjustable Basketball Systems

You'll see and feel the difference between Bison ZipCrank systems and other manufacturers' systems. Bison uses our experience as a manufacturer of competition grade equipment to offer TruGlass tempered glass backboards that give players a more realistic rebound. Every backboard has an aluminum frame just like those in the gym. The extra heavy poles and front crank style height adjustment are designed to change the height of the breakaway goal from 7½' to 10' with the turn of the removable crank handle. As an added bonus, Bison ZipCrank systems can be mounted closer to fences, walls or other obstacles than rear height adjustment systems. All systems include free fitted pole padding. Choose traditional clear or popular smoked TruGlass.

5" Power Adjust™

Power Adjust systems are just what the name implies, suitable for all the aggressive play that your driveway players can muster. Power Adjust is our most rigid and durable adjustable system in its price range. With over 50" of safe play area, 1" thick pole padding and a rear safety shock included in each system, you will feel confident knowing that you are investing in safety as well as playability. The 5" square pole adjusts easily from 7½' to 10' and is designed to mount the breakaway goal without putting any stress on the backboard even during the most aggressive play. Choose a 60" clear or smoked TruGlass backboard. Order Optional Backboard Padding for additional player safety.

6" Ultimate™ Adjustable

Add a gymnasium quality height adjustable system to your driveway. This official-size 42" x 72" TruGlass backboard and breakaway goal have all the specifications of our competition equipment! The massive 6" square pole will last a lifetime. The backboard is positioned 51" from the pole at 10' goal height. Safe play area extends to 64" at 8' and the system features pole padding for greater safety. A turn of the crank adjusts goal height between 10' and 7½'. Off-glass goal mounting protects the backboard from stress when players contact the rim during slam dunk action. A Supreme Court adjustable system will prep your neighborhood for tournament play!

Club Court™

Portable Basketball System

- Clear Acrylic Backboard
- 36" Safe Play Area at 10'
- Aluminum Backboard Frame
- Telescoping Height Adjustment
- Goal Mounted Directly to Pole for Backboard Protection
- Flex Goal
- Large Ballast Box
- Rolls on 4" Casters
- Rubber Feet Add Stability

Let the good times roll! Now there's a portable basketball system on 4" wheels with Bison's premium features. This sturdy portable easily rolls and folds to 78" maximum height for storage. An aluminum framed, 32" x 48" acrylic backboard gives a pro type look. The durable 1½" thick black pad on base and post improves player safety. Goal telescopes from 6½' to 10' with spring-assisted ease. Base and pole system are heavy-duty steel with a rich, textured silver finish. Rubber feet and a large weight box give the system excellent playing stability not found with water or sand filled, plastic base systems. Customer provides ballast (325# of solid cement blocks).

Shooting Station™ Adjustable Wall Mount Systems

ZipCrank™ Glass Shooting Station

A ZipCrank hand crank adjusts this 54" x 36" TruGlass backboard with ease. Removable hand crank adjusts goal height from official 10' to as low as 7½' for play by kids of all ages. Competition design breakaway goal and direct goal mount design makes backboard virtually unbreakable during normal play. Steel structure mounts to wall with three load spreading struts. Customer provides wall mounting anchors. There's a 30" safe play area at 10'. Five-year limited warranty. Shipping Weight: 180#, Truck

Qwik Change™ Acrylic Shooting Station

The look of a professional court at a budget price! Official-size goal raises and lowers with ease on this system that features a 32" x 48" clear rectangular backboard. Direct mount goal design protects backboard during slam-dunk action. No ladders or tools needed to change the goal height. The 7½' to 10' goal height adjusts from the playing surface in 6" increments. Entire system mounts easily to the wall with two load spreading struts. Customer supplies suitable wall mounting hardware. There's a 22" safe play area at 10'. One-year limited warranty. Shipping Weight: 105#, Small Package

Qwik Change™ Graphite Shooting Station

Our lowest cost adjustable wall mount system. Move the goal height from 7½' to 10' in 6" increments with a broom handle from your driveway. The 36" x 48" molded graphite fan-shaped backboard and official-size flex goal are direct mounted to the steel structure for superior backboard durability. QwikChange structure attaches to wall with two struts to spread the load. Customer provides wall mounting anchors. There's a 22" safe play area at 10'. One-year limited warranty. Shipping Weight: 90#, Small Package

WARNING: Bison will not assume liability resulting from improper wall attachment. Consult a qualified contractor for installation of a wall mount system. Bison residential basketball systems are not warranted for non-residential use.

Basketball Safety Padding

Outdoor Backboard Padding

This molded DuraSkin padding is similar to that used in high schools, colleges and pro arenas across the country, but it is designed specifically for outdoor durability. Contact with backboard is more likely at home due to the use of adjustable height backboards. Padding provides player protection when play is rough. Black padding fits most rectangular backboards but may require drilling. One-year limited warranty.

Basketball Accessories

Driveway Court Marking Kit CM100

Put a free throw lane and three-point line on your driveway with this paper stencil kit. Kit includes stencil pattern and two cans of high quality, specially formulated court marker paint. Order CM100S for stencil only without paint. Shipping Weight: 8#; Small Package

Court Marker Paint CM111

Specially formulated, white spray paint is made to last on concrete or asphalt. Easy-spray nozzle on 18 oz. can. Requires two to three cans per complete court. Priced per can. Shipping Weight: 2#; Small Package

Ground Anchor Kit BA79UGP

This allows any Bison pole system with a removable pedestal base to be relocated. Includes J-bolts, template, rebar, nuts, washers, lockwashers and instructions. Shipping Weight: 14#; Small Package

Ground Sleeve for 4" Pole Systems BA709

Make your direct bury system removable with the installation of this ground sleeve. When used with any Bison package that has a 4" square direct bury pole system, you can store your system during the off-season or take the basketball court with you when you move. Easy-to-install, rust-proof aluminum sleeve is 24" deep. Shipping Weight: 9#; Small Package

AirBall Grabber BA1111

Spend more time playing and less time chasing! AirBall Grabber will mount to any existing residential basketball system and catch most missed shots and all made shots before they roll down the hill into Mom's flowers or the neighbor's yard. The durable netting creates a "halo" around the backboard and extends all the way to the ground to contain errant passes, blocked shots and airballs. Get more play from your basketball system investment with AirBall Grabber. One-year limited warranty. Shipping Weight: 10#; Small Package

Heavy-Duty Competition Net BA51H

Our most durable traditional nylon net. When your residential net wears out, replace it with this heavy net for the look and feel of competitive play. Shipping Weight: 1#; Small Package

Economy Basketball Net BA52H (not shown)

Weather-resistant nylon net will fit on any style goal. Our most affordable net. Shipping Weight: 1#; Small Package

Bison® Limited Warranties

All Bison products are warranted against manufacturing defects at the time of delivery. In addition, most products are covered by warranties stated in the description of the product or in supporting specification charts. Where listed as "limited", warranties shall cover damage or failure that occurs during the course of "normal or intended use" of the warranted product. Normal or intended use shall be described as activity that is necessary for the participation in the sport for which the equipment is designed.

Limited warranties on Bison basketball equipment include damage caused by slam dunking and normal player contact with the goal, but does not include damage caused by deliberate hanging, multiple player hanging, vandalism, non-basketball activities or any other activity that could be regarded as abusive.

When warranties are stated as "unconditional" or "unconditional replacement", the above stated limitations do not normally apply. Normal deterioration of products due to weather, wear and tear, or other causes that do not affect functional use are not covered by any Bison warranty regardless of type of stated warranty.

All Bison Safe Stuff backboard and pole padding is covered for a period of one year.

All warranties are valid only when product is used in the intended application as outlined in Bison's printed literature, when installed according to Bison's instructions and when matched with compatible

components as described in Bison literature. Under no circumstances will product shown in this Bison Premium Residential Sports Equipment Catalog be warranted for commercial or institutional use. Due to the abusive nature of pay-to-play basketball facilities, unless specifically agreed to in writing, Bison products carry no warranty when used in a facility where players pay an individual fee to use Bison equipment.

Bison will pay ground freight only to replace defective merchandise. Bison will not be responsible for labor costs incurred due to product defects.

The product information and specifications presented in this catalog are subject to change at any time without notice. Never use this catalog as a guide for installation. Consult the instructions provided with each system prior to installation.

Backyard Volleyball *On the Grass or At the Beach*

SVB2000A

Recreational Volleyball System **SVB2000A**

The perfect volleyball system whenever the goal is fun! Install a superior quality Bison volleyball system that will enhance the level of fun and aesthetics at your home. These systems have the durability, dependability and good looks that Bison has built our basketball reputation upon. The rigid, lightweight aluminum pole has a silver vein powder coated finish and can be permanently installed in concrete or used with our VB21 ground sleeves (optional). The net is infinitely adjustable from competition men's height, 7' 11⁵/₈", down to 6' 6" for players of all ages. The poles are capped to keep out moisture. Systems come complete with fluorescent top tape volleyball nets that tension with a unique rope cleat. Standards have a five-year limited warranty. Shipping Weight: 110#; Truck

SVB5050

Outdoor Match Point™ Competition Volleyball System **SVB5050**

Play California-style sand volleyball. This tough system can handle power volleyball competition. The 3¹/₂" steel posts are galvanized and powder coated for maximum rust resistance and net is infinitely adjustable to insure exact net height for competitive games or family recreation. This outdoor system tightens the net with the same mechanism found on Bison Match Point gymnasium competition systems. Net is included. Order optional pole padding and boundary antennae separately. Five-year limited warranty. Shipping weight: 260#; Truck

Ground Sleeves for Outdoor Volleyball Systems

Sleeves are mounted permanently and allow for easy removal of your volleyball system when not in use.

SVB210 Order two sleeves for each SVB5050 system.

Shipping Weight: 35#/each; Small Package

VB21 Order two sleeves for each SVB2000A system.

Shipping Weight: 9#/each; Small Package

Boundary Kit **SVB26**

Bright orange 1/4" rope with excellent outdoor durability. Includes storage reel and corner stakes. Can be used on grass or sand. Shipping Weight: 4#; Small Package

Portable Volleyball/ Badminton Set

SVB400

Take net game fun anywhere you go. Enjoy volleyball or badminton at family picnics, class reunions, summer camps or school outings. You'll always be ready to play quickly with these snap together poles. System includes poles, net, guy ropes and zippered carrying case. Shipping Weight 3#; Small Package

SVB400

The Patriot™

Patriot™ Flag Pole System

BA9001

Far superior to typical residential telescoping aluminum poles! This is a commercial quality spun brushed aluminum flag pole that tapers from 5" to 3" at the top and stands 25' tall. Bison's complete Patriot package includes pole with pedestal-style mounting base, ground anchor kit, durable 4' x 6' American flag and all rope and hardware necessary for installation. Shipping Weight: 250#; Truck

Replacement 4' x 6' American Flag

BA9000F Shipping Weight: 2#; Small Package
